in digital empires anu bradford examines the ideological origins societal implications
and the relative global influence of three contrasting regulatory approaches towards the

digital economy throughout she compares the eu s approach with both the us based techno libertarian model and china s authoritarian approach at a moment of time when digital societies are at an inflection point this book lays bare the choices we face as societies and individuals explains the forces that shape those choices and spells out the stakes involved in making those choices

modern institutional economics was created to study the institutions of pre digital economies and is based on reductionist approaches but digital capitalism is producing institutions of unprecedented complexity this book argues therefore that not only the economic institutions themselves but also the theoretical foundations for studying those institutions must now be adapted to digital capitalism the book focuses on the institutional complexity of digital capitalism developing an interdisciplinary framework which brings together cutting edge theoretical approaches from philosophy first of all object oriented ontology sociology especially actor network theory evolutionary biology and cognitive science in particular the book outlines a new approach to the study of institutional evolution based on extended evolutionary synthesis a new paradigm in evolutionary biology which is now replacing neo darwinism the book develops an enactivist notion of extended cognition and cognitive institutions rejecting the individualistic and mechanistic understanding of economic rationality in digital environments the author experiments with new philosophical approaches to investigate institutional complexity for example the ideas of the flat ontology and the assemblage theory the flat ontology approach is applied to the study of human robot institutions as well as to thinking about post anthropocentric institutional design assemblage thinking allows for a new much less idealistic look at blockchain and smart cities blockchain as digital institutional technology is considered in the book not from the viewpoint of minimizing transaction costs as is customary in the modern institutional economics but by using the theory of transaction value which focuses on improving the quality of digital transactions the book includes a wide range of examples ranging from metaverses cryptocurrencies and big data to robot rules smart contracts and machine learning algorithms written for researchers in institutional economics and other social sciences this interdisciplinary book is essential reading for anyone interested in the interplay of institutional and digital change

this book explores college students lived experiences of using digital technologies for their academic work access to and use of digital technologies is an integral aspect of

higher education in the twenty first century however despite the tech savvy image of them propagated by the media not all college students own and use technology to the same extent to ensure that students have the best opportunities for success all in higher education must consider ways to increase affordances and reduce barriers in student technology use this book explicitly examines urban commuter students use of digital technologies for academic work on and off campus

the edited volume critical ict4d highlights the need for a paradigm change in theorising designing and researching information and communication technologies for development ict4d engaging authors from the majority world and entering a process of restoring epistemic justice in knowledge production and ownership the text reflects on the histories and narratives around development programmes their deep rooted socio political background and the power relations integrated into or induced by such measures problematises the current scholarship and practices through decolonial and pluralistic approaches built with an explicit perspective of resisting epistemic violence constructs justice enacting engagements of technologies with society offering thematic discussions in many development sectors with up to date case studies informed by recent research in the field it sheds light on constructive contributions of critical ict4d research written in accessible language the book will appeal to postgraduate students fellow researchers policymakers in the fields of sociology development studies sts critical data studies surveillance studies international relations public administration and information systems the open access version of this book available at taylorfrancis com has been made available under a creative commons attribution cc by 4 0 license
